

What LawLogix Can Do for Your Organization

LawLogix helps you:

1. Create customizable reports:
 - a. Comply/qualify for your various grants (e.g., print out clients by address, zip code, ethnic background, etc.)
 - b. Manage and improve accountability of staff and caseloads
 - c. Generate daily cash out reports, invoices (Unsent/Paid/Partial Pay) and statements
 - d. Track expiration dates
 - e. Monitor case status reports
 - f. Produce monthly internal reports and much more
2. Meet your malpractice insurance compliance (and often get premium reductions) with:
 - a. “OnDocs™ and Notes” area — complete communication docket (includes all forms submitted, documents, emails, phone calls, calendar events, reminders and much more)
 - b. Audit trails
 - c. User security privileges, SSL encryption and security protocols
3. Enable your staff to easily schedule appointments and meetings for each other with our inter-office/master calendar (and at your option, only grant certain people access to your calendar).
4. Replace your expensive billing software and eliminate duplicate data entry into a billing system (or use for internal tracking and passing on of billing information to your accounting department).
5. Process cases more efficiently and economically: our top clients report up to 48% reduction in case processing costs.
6. Produce flawless forms more quickly (i.e., one time data entry) without the hassle of updating software on your computer/server. You can also take advantage of our e-filing and PERM technology.
7. Communicate more effectively with foreign nationals through the use of multi-language online questionnaires in English, Spanish, French, German, Chinese, Japanese and Russian.
8. Anticipate all critical deadlines well in advance through the use of our automated reminders, appointment, calendar and expiration reporting features.
9. Eliminate “misplaced” files by creating virtual “digital” files including complete communication docket, facilitating file sharing between offices and working from home or while on the road.
10. Allow volunteers and pro bono lawyers secure access to assigned cases from the comfort of their home/office, often resulting in substantially increased availability of busy legal professionals to provide case assistance.
11. Migrate your historical data out of your aging immigration forms database (e.g., AIDE™, ImPro™, ImmForms™, and many others) into our state-of-the-art system — for a complete “switch-over”.
12. Achieve a seamless transition to our system with expert onsite training and ongoing customer support.

*Trade and service marks, including AIDE (property of Immigration AIDE); ImPro (property of Immigrant Software Corp.); ImmForms (property of West, a Thomson business); and LawLogix (property of LawLogix Group, Inc.) are the respective property of the named companies.

You practice Immigration Law...we'll handle the rest.sm
